## Professional Summary

Accomplished software developer with hands-on expertise in Java programming, Kotlin for Android development, and full-stack application development using Spring Boot and React.js. Skilled in designing robust RESTful APIs, managing both SQL and NoSQL databases, and applying Agile methodologies to deliver scalable solutions. Demonstrates strong capabilities in technical mentoring, curriculum design, and classroom management, fostering deep student engagement through project-based learning. Known for effective debugging, code optimization, and the delivery of high-quality, responsive web and mobile applications. Career goal: to drive innovative software solutions while continually advancing instructional strategies and team impact.

## Skills

### 💻 Technical Skills

- Java Programming
- Java/Kotlin (Android Development)
- Spring Boot
- Firebase
- RESTful API Design
- JavaScript, React.js & Next.js
- Git & GitHub

- 
- Full-Stack Development
  - Mobile App Development
  - Responsive Web Design
  - SQL & NoSQL Databases
  - Agile Development
  - Debugging & Code Optimization
- 

## Work History

### Programming Instructor (Java)

*National Institute of Information and Technology – Onitsha, Anambra State*  
January 2023 – Present

- Delivered high-impact training in Java and full-stack development, specializing in enterprise-grade tools like Spring Boot, Hibernate, and RESTful API development.
- Trained students to build real-world backend systems using modern Java frameworks, incorporating security best practices, modular design, and test-driven development (TDD).
- Introduced learners to practical Git/GitHub workflows, CI/CD concepts, and deployment to cloud platforms like Firebase and Render.
- Mentored over 100+ students, many now working in tech startups or freelance roles.
- Integrated frontend training with React (JSX, state management) to deliver complete full-stack education.
- Led project-based learning sessions focused on scalable, maintainable software.

- 
- Regularly updated curriculum to match industry trends and hiring demands.

### **Full-Stack Software Developer**

*Freelance | Collaborative Tech Projects – Onitsha, Anambra State*

July 2022 – Present

- Collaborated on web and mobile projects with distributed teams for startups and small businesses.
- Built scalable backend systems using Java, Spring Boot, and Firebase with secure REST APIs.
- Developed responsive frontend apps with React.js, Next.js, and Tailwind CSS.
- Built cross-platform Android apps in Kotlin with real-time features and cloud integration.
- Managed authentication systems, payment integration, and app deployment.
- Ensured timely delivery and maintained client satisfaction with quality work and communication.
- Continuously improved skill set to stay ahead in a fast-paced freelance environment.

---

## **Education**

### **Diploma of Higher Education – Software Engineering**

*National Institute of Information Technology – Onitsha, Anambra State*

November 2021 – September 2023
