Professional Summary

Innovative and solutions-driven Full-Stack & Mobile Software Developer with strong expertise across Java, Spring Boot, Kotlin, React.js, and React Native (Expo)—building scalable, high-performance applications for web and mobile platforms. Experienced in microservices architecture, Kafka event streaming, and Docker containerization, with solid knowledge of Redis for caching and high-speed data operations.

Demonstrates strong capabilities in technical mentoring, curriculum development, and practical instruction using real industry projects. Known for designing clean architectures, debugging complex systems, and delivering polished user experiences. Career goal: to build scalable products, solve business problems with technology, and contribute to high-impact engineering teams.

Skills

Backend & Enterprise

- Java Programming
- Spring Boot
- Microservices Architecture
- Apache Kafka (Event-Driven Systems)
- RESTful API Design
- Redis (Caching & In-Memory Data Store)

Frontend & Web

- JavaScript
- React.js & Next.js
- Responsive Web Design
- Tailwind CSS

Mobile Development

- React Native (Expo)

- TypeScript
- Java/Kotlin (Android Development)
- Mobile UI/UX & Animations
- Cross-Platform Development

DevOps & Tools

- Docker & Containerization
- Git & GitHub
- CI/CD Concepts
- Firebase (Auth, Firestore, Cloud Messaging)

Databases

- SQL Databases
- NoSQL Databases (MongoDB, Firebase)

General Engineering

- Debugging & Code Optimization
- Full-Stack Development
- Agile Development
- System Design Basics

Work History

Programming Instructor (Java)

National Institute of Information and Technology – Onitsha, Anambra State
January 2023 – Present

- Delivered advanced training in Java, Spring Boot, Hibernate, and enterprise development patterns.
- Trained students to build backend systems using REST APIs, microservices, Docker, and Kafka workflows.
- Guided learners through Git/GitHub workflows, CI/CD concepts, and deployment using Firebase & Render.
- Mentored 100+ students, many now working in startups or freelance roles.
- Integrated frontend modules using React & TypeScript for full-stack training.
- Ensured curriculum stayed aligned with industry standards.

Full-Stack & Mobile Software Developer

Freelance | Collaborative Tech Projects – Onitsha, Anambra State

July 2022 – Present

- Built backend systems with Spring Boot, Java, Docker, Redis caching, and secure authentication.
- Developed cross-platform mobile apps using React Native (Expo) and TypeScript with animations.
- Delivered responsive web apps with React.js, Next.js, Tailwind CSS.
- Implemented real-time features via Firebase and Kafka-based event handling.
- Managed full software cycles: architecture, development, testing, deployment, documentation.
- Successfully shipped products for startups and SMBs.

Education

Diploma of Higher Education – Software Engineering

National Institute of Information Technology – Onitsha, Anambra State

November 2021 – September 2023
